I'm a Frontend React developer dedicated to transforming complex ideas into clean, intuitive digital experiences. With a passion for blending design and functionality, I create solutions that are not only efficient but also engaging and user-friendly. I thrive on building software that simplifies complexity and delivers meaningful impact.

EDUCATION

Bachelor of Science, Software Engineering,
University of Engineering and Technology, Taxila
CGPA 3.82/4.0

09/2022 – Present

WORK EXPERIENCE

MERN Fellow, Buildable

09/2025 – 11/2025 | Remote

- Implemented JWT-based authentication and authorization, enabling secure user signup, login and protected routes.
- Integrated online payment gateways Stripe to support secure transactions and payment verification workflows.
- Managed application state efficiently using modern state management solutions such as Context API, ensuring predictable data flow.

Web developer, Bitech

07/2025 – 08/2025 | Bahria Phase 7, Rawalpindi

- Developed and maintained web applications using HTML, CSS, JavaScript, React, Node.js, Express and MongoDB.
- Maintained knowledge of emerging technologies relevant to web development projects.
- Designed and implemented RESTful APIs to integrate with backend services.

MERN Intern, Innovaronix

10/2024 – 01/2025 | Remote

Achievements

- Enhanced UI performance by 40% by optimizing page load speed and implementing dynamic content rendering with React.
- Designed and developed responsive, user-centric web applications using React, improving UI performance and overall user engagement.
- Utilized React to build dynamic and responsive web applications, while integrating Tailwind CSS to create visually appealing, customizable, and consistent user interfaces while enabling faster development cycles.

React and Next.js Fellow, Bytewise Limited

06/2024 – 09/2024 | Remote

Achievements

- Build various projects that allowed me to enhance my skills in React and Next.js.
- Applied my knowledge of front-end development to create functional and responsive user interfaces, ensuring that user experience was always a top priority.
- Implemented server-side rendering (SSR) and static site generation (SSG) with Next.js. This optimized website speed by 40% and enhanced SEO performance.

SKILLS

Frontend: HTML, CSS, JS, Reactjs, Nextjs, Bootstrap, Tailwind CSS

Backend: Nodejs, Expressjs

Databases: MongoDB, SQL

PERSONAL PROJECTS

PDF Tool

- A powerful PDF tool website built with MERN stack, featuring converters (PDF → JPG, Word, OCR, etc.), merge/split, and more. Integrated with Stripe for premium features, making PDF management simple, fast, and secure.

SmartResume

- Developed a dynamic resume builder platform enabling users to create, customize, and download professional resumes.
- Implemented form-driven inputs for personal details, skills, education, and work experience with real-time preview functionality.
- Built UI using React and Tailwind and back-end support with Node.js, MongoDB, Express.

MedTech

- Developed a website in the medical and technology field, integrated with a chat feature allowing users to ask questions to an AI assistant.
- Used React, Framer for animations, and Gemini API for Chat assistant feature.

StreamBank

- Stream Bank is a modern web application built with TypeScript, Tailwind CSS, and Next.js, offering a sleek and responsive user experience.
- Used gsap for animations.

WebControl CMS

- Designed and developed a dynamic company website with an integrated admin panel for centralized content and data management using MongoDB, express, Nodejs for backend and React and Tailwind CSS for Frontend..

Furniture Studio

- Developed Furniture Studio an ecommerce website using React, Node, Express and MongoDB featuring both user and admin panels.

VOLUNTEER EXPERIENCE

SoftDesk

09/2024 – 05/2025

Worked as a Senior Executive on the Alumni team, actively organizing and participating in various events, including Tech Spectrum 2.0. Engaged with alumni and participants to foster connections and facilitate smooth event execution.
